

# Motor Vehicle Accident

Manage your MVA claims with the industry's most experienced and successful partner

## WHY OUTSOURCE

Automobile-accident patients are often classified as self-pay—even when available insurance policies could pay 100% of billed charges. Does your patient access team know how to identify MVA related injuries?

## COMMON MVA BARRIERS

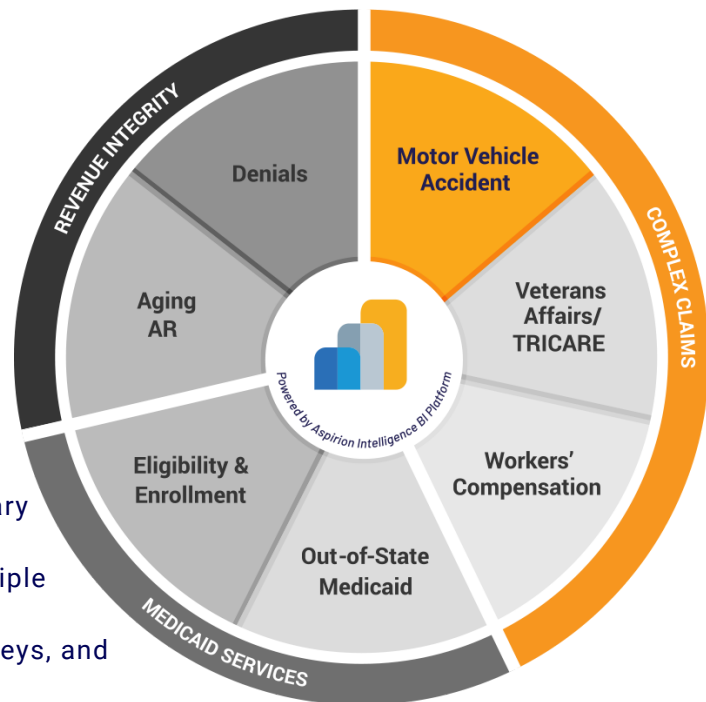

- Paper-driven, time-consuming processes
- Patient access team unable to gather all necessary information
- Extensive investigation required to discover multiple policies
- Working with insurance adjusters, plaintiff attorneys, and patient/family
- Differing state laws
- Producing coordination of benefits for OHI

## THE ASPIRION DIFFERENCE

Through our industry-leading MVA practice, our experts will pursue every avenue for reimbursement to ensure you get the most out of your claims.

### With Aspirion as your partner, you will get:

- Dedicated team to take on extensive workloads
- Complimentary legal services necessary to obtain payment
- Comprehensive patient access training to ensure proper screening
- Complete investigation into all coverage areas—first-party automobile, medical payments, PIP, health insurance, and auto liability insurance

## Our Process

**Investigate** We investigate accident claims to identify and collect payment that may be available across various insurance policies, such as automobile, motorcycle, homeowners, renters, recreation, business liability, or travel insurance.

**Verify** If no coverage exists on these insurance types, we'll obtain written verification for coordination of benefits and will return accounts quickly to be billed.

**Complete** If appropriate, we will file and manage hospital liens against pending liability settlements for uninsured patients until payment has been secured.
