

Workers' Compensation

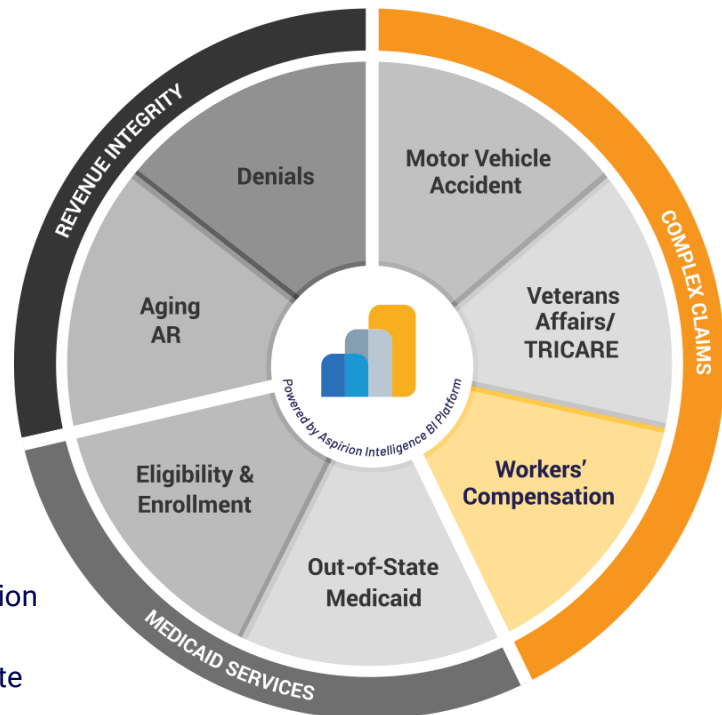

Get more reimbursement by eliminating incorrectly paid workers' compensation claims

WHY OUTSOURCE

Due to time-intensive processes and changing requirements, many facilities struggle to collect appropriate revenue from workers' compensation claims.

Without a single, consistent set of rules, 80% of workers' compensation claims are paid incorrectly. When trying to collect reimbursement, facilities have to follow complicated processes, including:

- Verifying with employer and receiving authorization
- Completing labor-intensive claims
- Following strict fee schedules, which vary by state
- Adhering to state reporting requirements
- Working with insurance adjusters, plaintiff attorneys, and the patient/patient's family

THE ASPIRION DIFFERENCE

Workers' compensation is a legal process with healthcare elements—which means successful reimbursement requires expert practices from both industries.

Our dedicated process involves:

- Investigating and determining the correct payor and/or potential additional insurances timely to eliminate aging
- Obtaining necessary paperwork to submit clean claims
- Aggressively following up on a claim until it is resolved
- Providing attorney support when necessary to represent the provider as a direct party to ensure payment
- Pursuing penalties and interest whenever appropriate
- Providing free hospital staff training to help eliminate reasons for slow/non-payment
